1. Truyền props vào function

```
const TenFunction = (props) =>{
    const {tenProp =...}=props;
}
```

2. Truyen naviagation

- cai dat
```
const Detail = (props) =>{
    const {navigation}=props;
    //dieu huong
    const data=navigation.getParam('data');
}
//truyen model vao detail
return(
<View>
    <Product dataProd={data}/>
</View>
);
```
======

Section View: gồm header, content, footer

Tạo ứng dụng React Native cli

npx react-native init Pr1
